# Porosity: Kwong Centre

THE KWONG CENTRE

An architectural rendering of a modern brick building, 'The Kwong Centre'. The building features a prominent brick wall on the left with the name 'THE KWONG CENTRE' in large, light-colored letters. To the right, a large, open-air courtyard is visible, featuring a wooden deck, steps, and various plants. Several people are shown in the courtyard: a woman in a white hat and black top is walking, a man in a dark suit is walking, and a group of people is jogging. The scene is set in a bright, sunny environment with trees and a clear sky.

**Urban Design Principles:**

# **Urban Design Guidelines- A Draft Template**

**Outpatient. Outreach.**  
Reframing Urban Design and Mental Health

**A R K**

# Urban Design Guidelines for Mental Health- A Draft Template: Context

## 1. Context

### a) Objective:

- Creating a Mental Health Facility that is compatible with its broader context

### b) Design Strategy

- Built form should maintain harmonious relationship with surround environment with respect to scale, massing and materials
- Building program should also integrate uses that are complementary to the surrounding environment
- Connection to street forms a natural extension of the urban fabric accommodating all modes of arrival

### c) Guidelines

#### i. Address Surrounding Context

- Establish strong connection to street
  - Create vehicular linkages
  - Create pedestrian/cyclist linkages
  - Create visual linkages
- Encourage Orientation Through Context
  - Frame views and vistas
  - Establish landmarks
  - Create focal points

**Outpatient. Outreach.**

Reframing Urban Design and Mental Health

**A R K**

# Urban Design Guidelines for Mental Health- A Draft Template: Context cont.

## b) Guidelines

### ii. Address Neighbouring Buildings

- Coordinate Site Design
  - Create coherent streetscape
  - Create relationships in building placement and setbacks
  - Define streets with continuous built form
  - Provide compatible massing relationships
- Coordinate Building Access
  - Create a coherent streetscape
  - Locate entrance in relation to those of adjoining buildings
  - Avoid conflict between pedestrians, vehicles and service elements
  - Separate service elements

### iii. Address Diverse Socio-Cultural Context

- Foster Inclusive Environment
  - Create environment that mimics a safe and cozy home
  - Combine psychotherapeutic and architectural methods
- Break Down Barriers
  - Use design/artwork that transcends cultural preference (i.e. nature)
  - Provide space for family, spirituality, and multi-faith uses
