Visions & New Approaches

Children
& Families

What are the challenges?

What are the challenges?

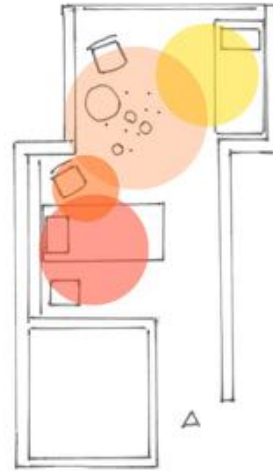

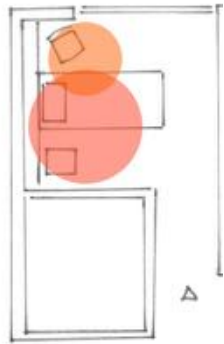

Challenge No.1: a child never comes alone.

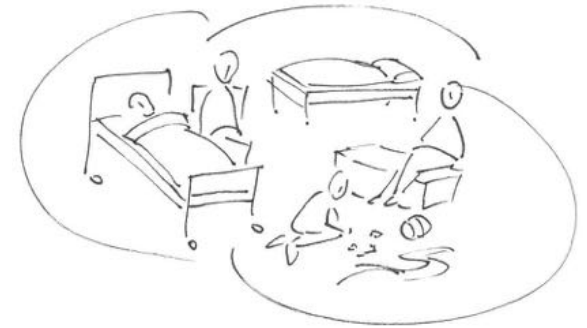

Challenge No.1 → more space for „care sharing“ & communication

...in the wards...

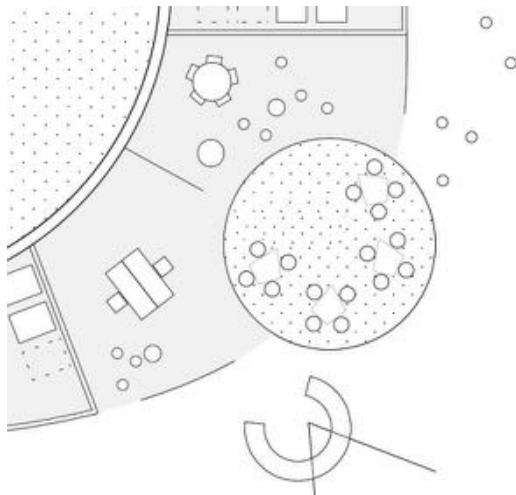

Standard

Children's hospital

...and in circulation & meeting hubs

What are the challenges?

Challenge No.2: „child“ does not equal „child“.

Challenge No.2 → Flexibility & Differentiation

What are the challenges?

Challenge No.3: children need everyday life.

Challenge No.3 → more orientation / more positive distraction

How to translate

more space

more differentiation

more flexibility

more space for communication

more orientation

more distraction

into architecture?
