Highlands & Islands Medical Service –
fore runner to 1948 UK NHS, set up 1913...

Geographical context

Eurostat regional yearbook 2018

▼ Eurostat regional yearbook 2018

▼ Chapter 2: Population

2.1 Life expectancy at birth

2.2 Mean age of women at childbirth

2.3 Median age

2.4 Old-age dependency ratio

2.5 Total population change

▼ Chapter 3: Health

▼ Legend Layer

Life expectancy at birth, by NUTS 2 regions, 2016 (years, EU-28 = 81.0)

- < 78
- 78 - < 80
- 80 - < 82
- 82 - < 84
- ≥ 84
- Data not available

Note: Albania and Serbia, national data. Mayotte (FRA5): 2015.

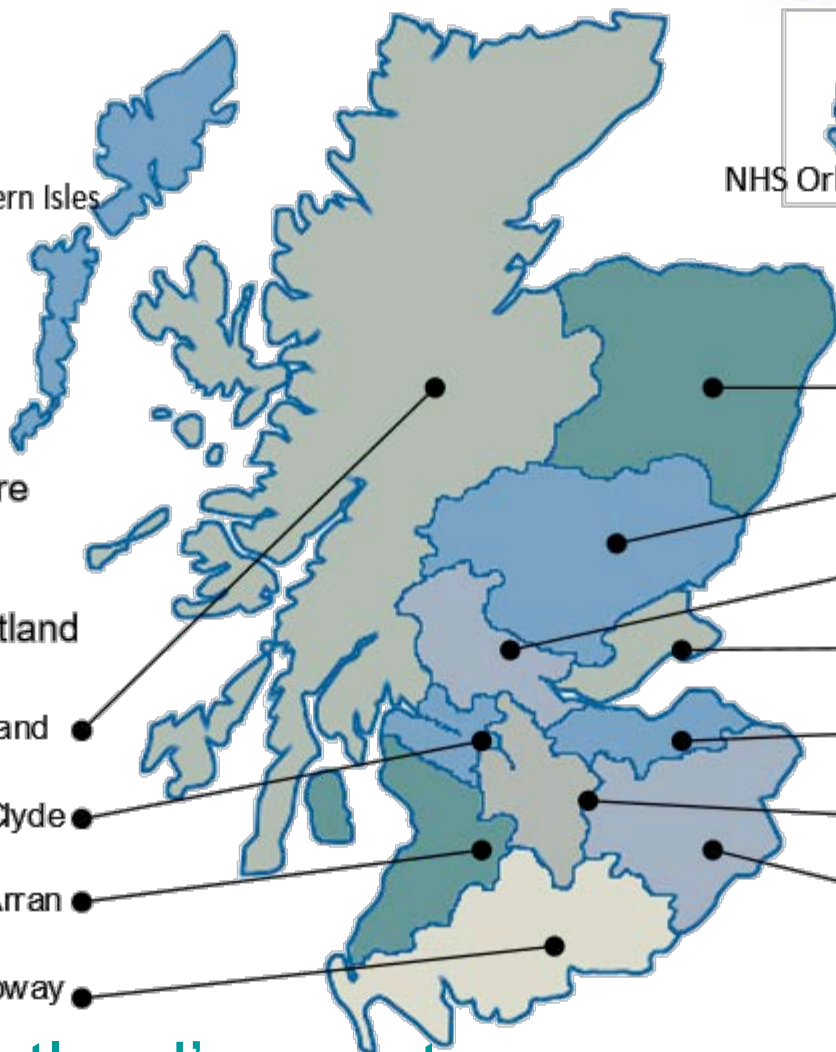

Area	
- Total	30,981 square miles
- Land (%)	(80,240 km ²)
- Water (%)	97%
	3%
Coastline	7,330 miles (11,800 km)
Land borders	England 96 miles (154 km)
Highest point	Ben Nevis 1,345 m (4,413 ft)
Lowest point	Atlantic Ocean , 0 m
Longest river	River Tay 120 miles (190 km)
Largest inland body of water	Loch Lomond 27 square miles (70 km ²)
Climate:	Temperate, Subarctic, Tundra
Terrain:	mountains, hills, forest, bog, urban
Natural resources	iron, zinc, potash, silica sand, coal, fish, timber, wildlife, petroleum, natural gas, hydropower

Political context

NHS Scotland's assets management rests with 14 geographical and 8 Special NHS Boards

Political context

The size of IAs varies depending on council boundaries:

Most NHS boards have two or more IAs within their boundary, but there is a range up to six IAs for NHS Greater Glasgow & Clyde.

Clackmannanshire and Stirling councils have created a single IA with NHS Forth Valley.

Orkney

NHS Shetland

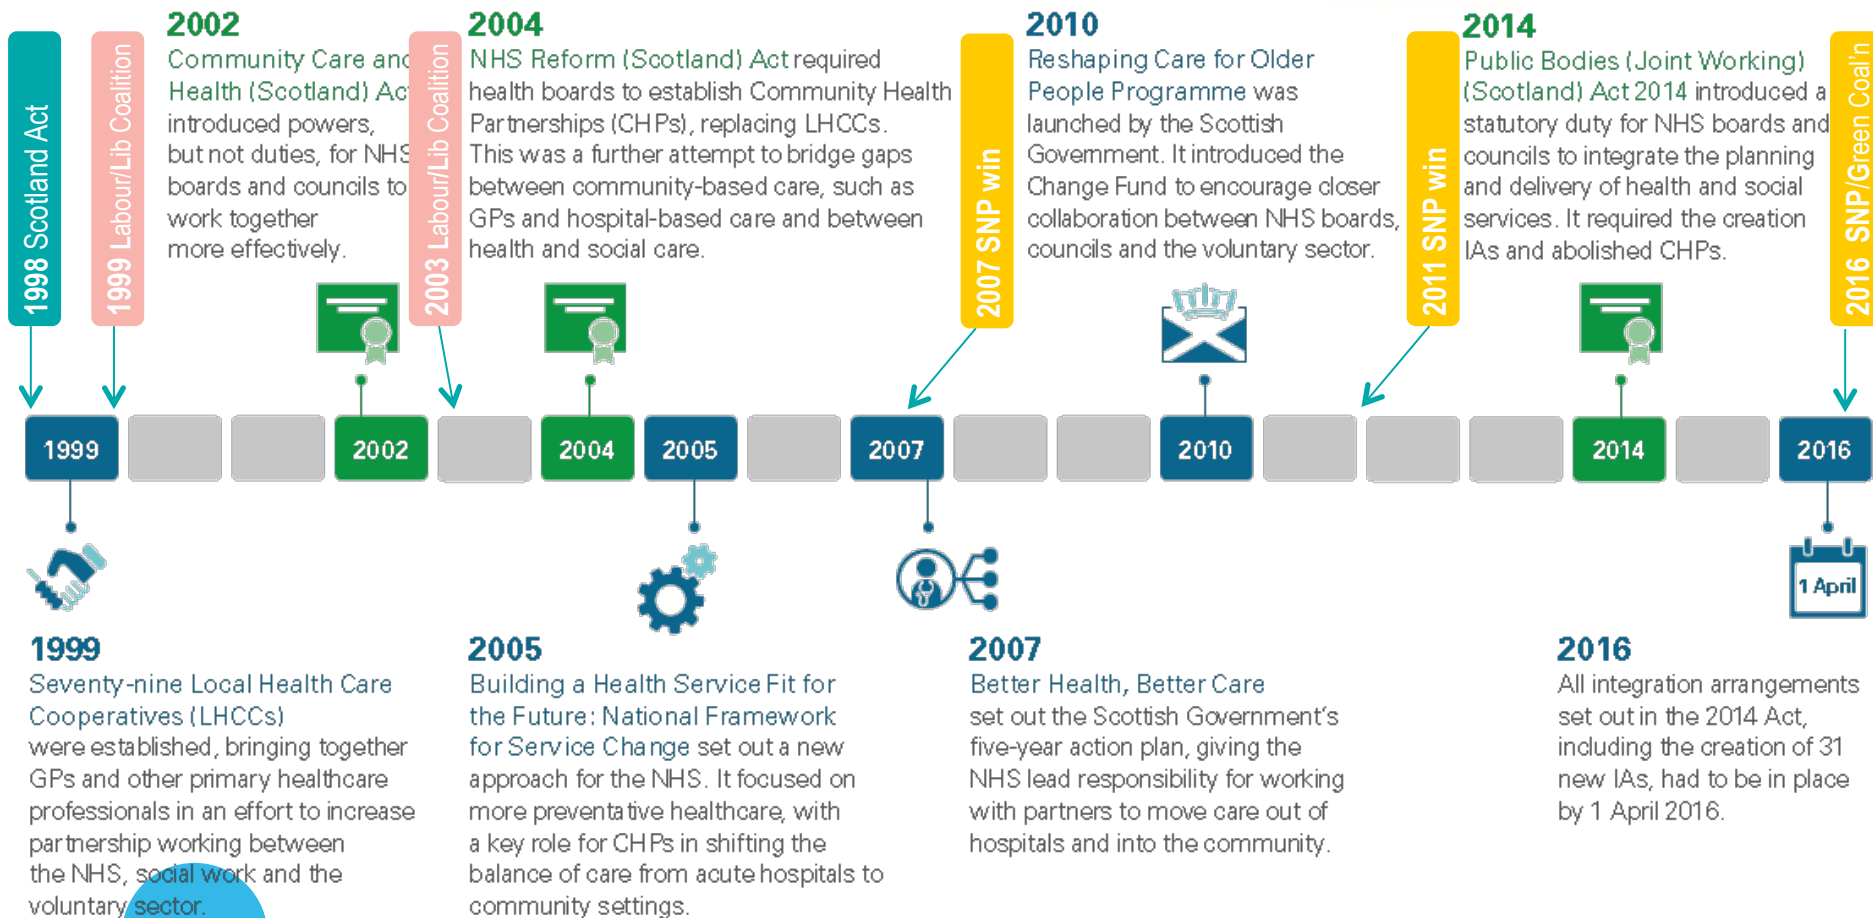

Six NHS boards have one single IA .

Highland are only area to use a lead agency model.

NHS leads on adult services and Council leads on children's services.

Scotland's 31 Integration Authorities (IAs) responsible for local Health & Social Care

Political context

1999 re-established Scottish Parliament... then consistently electing left-of-centre governments

Political context

2010 everyone is able to live longer healthier lives at home, or in homely setting...

Political context

Scottish Government
Riaghaltas na h-Alba
gov.scot

NATIONAL PERFORMANCE FRAMEWORK

2019...live longer healthier lives supported by self-management in your local community...

Clinical context

**“ NHS Scotland performed
1.5 million hospital procedures
4 million outpatient attendances,
17 million GP consultations,
employed 150,000 FTE staff
in year 2016-17 ”**

Place Based Infrastructure

“The assessment of design quality is an integral part of the business case approval process which aims to ensure that the outcomes of designed development projects meet the Government’s strategic objectives and expectations for public investment.”

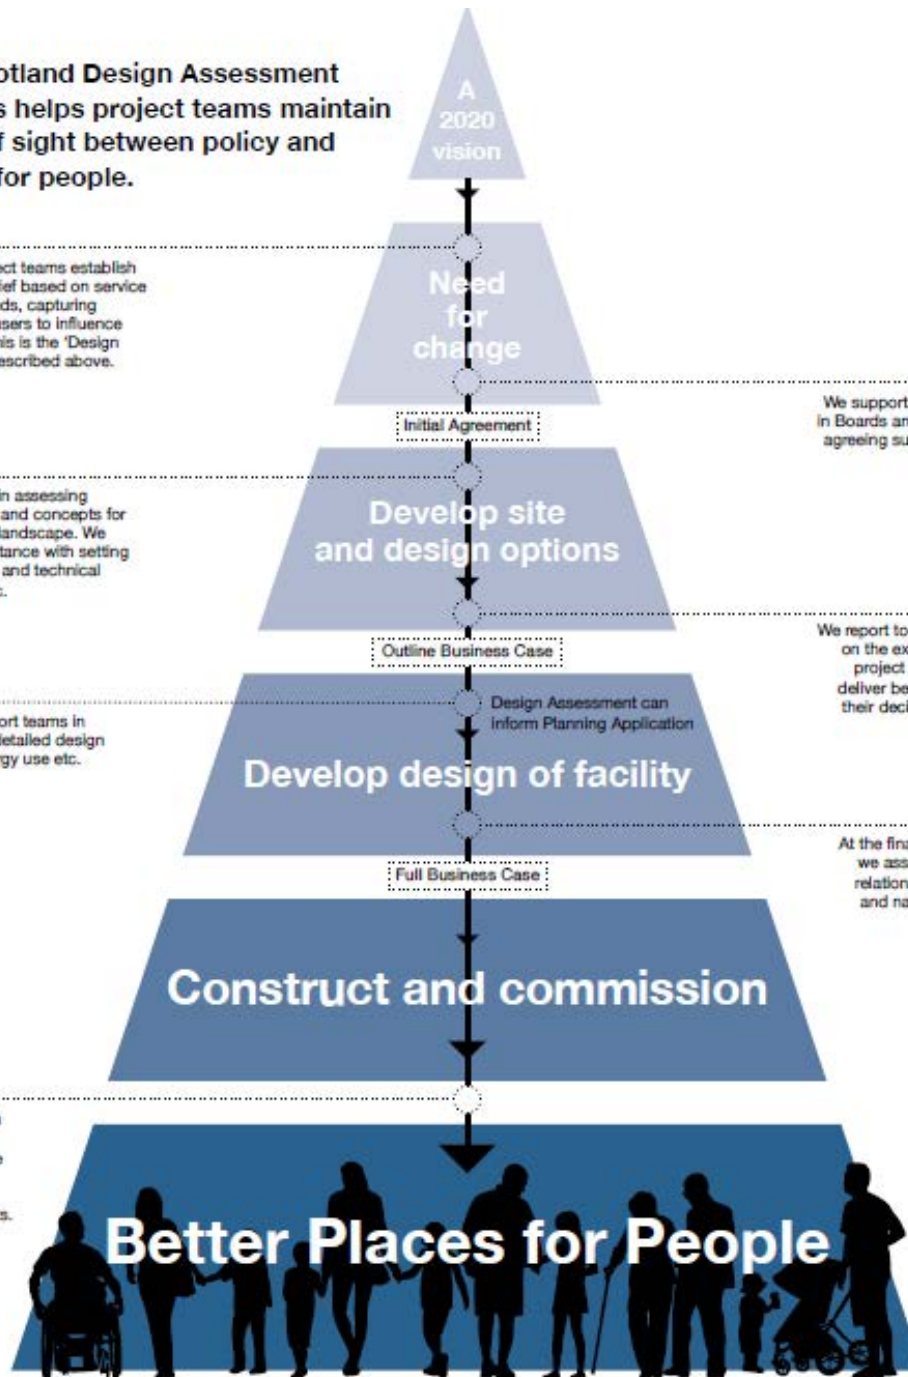

NHSScotland Design Assessment Process helps project teams maintain a line of sight between policy and places for people.

We help project teams establish a strategic brief based on service and local needs, capturing the voice of users to influence outcomes. This is the 'Design Statement' described above.

We can help in assessing early options and concepts for building and landscape. We provide assistance with setting sustainability and technical standards etc.

We can support teams in considering detailed design aspects, energy use etc.

We help learn lessons and celebrate successes, informing future projects.

NHSScotland Design Assessment Process

Part of the Business Case (Financial) Process since 2010

Applies to all physical investments over circa £2m

Single process, but establishes project specific standards based on local needs.

Staff & community engagement at its heart.

LOCAL PROJECT TEAM

Develop IA, business case & design proposals / check and approve / submit

Initial Agreement

Develop IA :
Clearly set out needs, benefits, objectives, priorities & benchmarks

NDAP:
Support in developing Design Statement through stakeholder workshops

Develop Design Statement

Formal Assessment and Report

SUBMIT

Outline Business Case

Develop OBC:
Outline design that supports IA
eg: Site, ADB, Layouts, Risks, BREEAM, Strategies

NDAP:
Informal support on developing designs including BREEAM etc

Self Assessment of Design

Formal Assessment and Report

SUBMIT

Full Business Case

Develop FBC:
Detail design discharges IA & OBC recommendations
eg: Fire, M&E, Health Promo, Derogations

NDAP:
Informal support on detailed proposals including: SHM's and Sustainable Design etc

Self Assessment of Design

Formal Assessment and Report

SUBMIT

Consider IA / Business Case including level of support from NDAP

Eastwood Health & Care Centre

Eastwood Health & Care Centre

1.3 On entering the facility through the public entrance(s) there must be an immediate point of welcome and onward direction with routes to services being clearly legible.

The experience should be 'uplifting' and stress free in order to enhance a sense of wellbeing and value.

The layout and use of reception points (both human and electronic) must:

- not require you to repeat the same information at more than one reception point.
- aid easy access to additional services whilst visiting the facility
- allow confidential discussions.
- provide distinct identity to places where help can be sought such that it is clear where to go, and the nature of the help available there.
- Feel personal, rather than part of a pre-determined and inflexible system

Some views of what success might look like

You should preferably be able to see your destination (service reception and/or waiting area) from the main entrance area with interim journeys being as short as possible. Depending on the number and variety of services incorporated, there is likely to be the need for more than one reception point as the nature of interactions varies from check-in for appointments, through straightforward discussions (such as reporting housing faults) to sensitive personal enquiries, and these are therefore best handled separately. However legibility of where you go for transactional or more sensitive discussions must be clear, and should not be confused by multiple choices of essentially similar functions in the same area.

Eastwood Health & Care Centre

2.2 The layout of the facility must encourage close and easy working both within groups and between them, and flexibility in use to allow change over time.

Some views of what success might look like

- Working areas to be grouped by activity type (consulting/interview spaces together; desk based working together), rather than by service discipline, with spaces designed to be able to be used by a broad range of disciplines.
- Furniture and other storage systems (IT & physical storage) to be designed to support both data security, and the location flexibility required of staff such that they can be effective in their work environment "a place to store my stuff right by where I'm working".

- Circulation routes must be designed to allow staff to transfer easily and quickly between their work environments (consult to desk and back again) and to allow team's location to change over time as working groupings and the scale of groups change.
- Consulting zones to be designed such that consulting rooms grouped into variable configurations to accommodate changes in clinic size, and practice size.
- Social space (shared rest/lunch room) in particular must be located such that it's easily accessible to all staff and attractive enough to encourage use at meal times and other times.

Eastwood Health & Care Centre

Eastwood Health & Care Centre

note left on a wheelchair

“To Centre Manager Best designed health centre I’ve ever seen. A real pleasure to be here. Congrats to Architects and all who assisted them in getting it right.”

Technological solutions

eHealth 20:20 Vision: everyone's health can be better supported by smarter digital technology

Technological innovation

NHS Highland “Near Me”

What is NHS Near Me?

NHS Near Me is a new NHS Highland service which aims to provide NHS care close to patients' homes using telephone and video consultations.

In January 2018 the NHS Near Me service hosted its first clinics in Caithness.

Empathetic innovation

NHS GG&C “What Matters to Me”

NHS What Matters to Me

Jason LEITCH
“What Matters to Me” – a new vital sign | Jason Leitch | TEDxGlasgow

What matters to Me
- a new Vital Sign.

Vital Signs are taken to help assess a person’s health. It give clues to possible illnesses.

One of our biggest challenges in healthcare delivery is compassion. Focus is too often on new machines or drugs, at the expense of simple care, or empathy .

So, how would **you** answer?

https://www.youtube.com/watch?v=H_Z1ZvjKDE

. **“What matters to you?”**

Thank You
